

# Directorships

**When a unique and sensible approach counts**

- Independent Directors ready to take on challenging mandates
- Making the right decisions for companies in difficulty
- Protecting stakeholder value in contentious scenarios

Our team of highly experienced financial industry professionals act as independent directors and fiduciary partners in all manner of complex, contentious, difficult and litigious situations.

With our specialist knowledge and impartiality, we seek to drive realistic realisation strategies and communicate effectively with all stakeholders. Our presence on a board, often replacing existing directors, also provides comfort to investors as an alternative to formal insolvency proceedings.

Our directors have the reputation for taking independent and decisive action, to safeguard stakeholder value from potentially hostile and destructive actions.

Unconstrained by traditional institutional risk profiles, we make the tough, informed decisions that result realistic outcomes for stakeholders of entities in distressed situations.

When issues such as disputed valuations or missed liquidity targets result in relationships reaching breaking point, the incumbents are unlikely to achieve a positive resolution. Our directors provide the objectivity and proven experience for renewed confidence in stressful circumstances.
